

NADEEM CHAUDHARY

Full Stack Software Engineer

+4915510862231 • 25nadeemchaudhary.dev@gmail.com • [LinkedIn](#) • Berlin, Germany

Summary

Result-oriented Full Stack Developer with 4 years of experience in designing and developing web applications and microservices. Proficient in Angular, Node.js, JavaScript, Typescript, and SQL, with hands-on expertise in REST APIs, CI/CD pipelines, and containerized deployments using Docker, with a strong track record of delivering high-quality software solutions. Demonstrated ability to work independently with a practical mindset, collaborating with engineers on software development projects, and eager to learn Agentic and Generative AI.

Education

International University of Applied Sciences

Master's in Data Science

04/2025 - Present

University of Mumbai

Bachelor's of Engineering in Computer Science

08/2016 - 10/2020

Experience

NuSummit

Mumbai, India

Associate System Analyst - Backend Developer

11/2023 - 04/2025

- Reduced operational costs by 5% by developing RESTful APIs to search and download CKYC data.
- Automated data transfer using Cron Jobs in Node.js for seamless database synchronization.
- Implemented real-time logging and monitoring using Loki and Grafana to keep track of system health and issues.
- Configured CI/CD pipelines on Azure to streamline deployment and minimize manual errors.
- Contributed in Agile ceremonies including sprint planning, task refinement, and user story writing using Jira.

CitiusTech

Navi Mumbai, India

Software Engineer

07/2021 - 11/2023

- Improved project delivery time by gathering technical requirements and converting them into software modules.
- Built user dashboard to display user-specific tasks using Angular.
- Integrated AWS Systems Manager Parameter Store for secure credential management.
- Designed and built Restful API in NodeJS to save and update user task in database.
- Applied state machine principles to orchestrate user task status.
- Reduced bug count by 30% by implementing unit test cases using Chai and Mocha.

Skills

Core: Data Structure · Object-Oriented Principles

Programming Language: JavaScript · Java

Backend Technologies: Node.js · Typescript · REST API · SQL

Frontend Technologies: Angular · React · HTML · CSS

DevOps: Git · Docker · AWS · CI/CD

Logging & Monitoring: Grafana · Prometheus · Loki

Methodologies: Agile

Languages

English Proficient

Deutsch Beginner
